

P3 Home Learning August to October 2026

Here are some activities your child could do at home, individually or together as a family. Children can share their home learning with the class too. We'd love them to do that!

Number knowledge

Use the QR codes to practise skip counting, adding 10!

Ask an adult to give you a starting number to count up from and back from, in tens

Make sure you know the order of the days of the week, starting from any day!

Can you work out how many days it is until a particular event, such as going to a club, seeing a relative or going to a party.

Can you spell them too?

Spelling

Use the word cards in your home learning pack to practice your tricky words – which bit of the word is unhelpful and tries to trick you?

Remember to practice your weekly word list too – the list is on the next page.

Practise your French colours.

Make a poster to display the colours in French. Maybe it will be a rainbow or ice-creams!

Zones of Regulation

Can you create a sequence of movements to match how you are feeling? For example, if you feel in the yellow-zone you may stamp your feet for frustration, being cross or showing excitement, and if you are feeling content you might move in a more gentle way.

2D Shape hunt!

Find objects in your home or surrounding area. Can you identify their shapes, draw them and label them?

READ!!!

Every day if you can!

It doesn't always have to be a book – it can be a magazine, instructions for a game or how to build something.

Handwriting practice

Use lined paper and practise getting your handwriting the correct size.

Your lowercase letters should take up half the line space. We do not write in capital letters.

You could copy out the lyrics to a current song you like..

Learn to tie your shoe laces – we have certificates for those who can!
