

What is fairtrade? Research to find out and then scan your cupboards or shelves in the supermarket for any fairtrade examples.

Make something from junk materials to show and tell in Sustainability Week

Art

This term we are learning about the Celts. They had very distinctive designs that we still see today on jewellery, fabrics and decorative work. Design or colour your own pattern using inspiration from this genre.

Spelling

Try some of these ideas with your word lists – on the next page.

- Write your words in bubble letters and colour them in
- Write them out in capital letters and then lowercase letters
- Write them with your eyes closed
- Use an old newspaper or magazine and cut out and stick the letters to make the words
- Type the words using a word processor and try out different fonts, colours and sizes

Read

- Turn your favourite part of a story into a comic by creating pictures and dialogue in speech bubbles. Bring it into school to share.
- Write a book review on a book you have read recently, to share with your class and add to our display.

Symmetry/3D Shape

- Look for symmetry in your house. Draw or photograph the examples you find. Take a walk and look for symmetry in nature and do the same
- Find everyday examples of 3D objects in your house. Make a chart of your findings.

Health and Wellbeing

Get ready for sports day by practising your balancing, throwing and running skills at the park or in your garden.

Money

Create a pretend shop using items in your house. Make price tags and play games with a friend or family member.

Buy things and give change from 10p, 20p, 50p and £1. Can you pay for the same item in different ways?
